Summary

Machine Learning Engineer with a strong foundation in Python, SQL, and data analysis, along with hands-on experience in developing machine learning models using real-world datasets. Skilled in data preprocessing, feature engineering, and model evaluation to solve practical problems. Passionate about building scalable ML solutions and leveraging data-driven insights in dynamic environments.

Education

Universal College of Engineering, Maharashtra, India

Bachelor of Engineering in Artificial Intelligence & Machine Learning

August 2023 – July 2027

CGPA: 8/10

Skills

Programming: Python

Libraries/Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib

Tools: Git, GitHub

Databases: SQL

Projects

AutoML Model Builder

Python, Streamlit, Pandas, Pandas Profiling

Developed an interactive AutoML web application enabling users to upload datasets, perform automated EDA, and train multiple machine learning models. Implemented model comparison and selection pipeline with downloadable best-performing model.

Book Recommendation System

Python, Scikit-learn, Flask, HTML, CSS

Built a book recommendation system using collaborative filtering and popularity-based methods. Designed a simple web interface with Flask to deliver personalized book suggestions based on user preferences.

Travel Recommendation System

Python, Scikit-learn, Pandas, NumPy, Matplotlib, Streamlit

Developed a travel recommendation system using content-based and popularity-based filtering techniques. Implemented a Streamlit interface to suggest similar destinations based on user input (e.g., India Gate) with data-driven insights.

Stock Market Prediction (LSTM)

Python, TensorFlow/Keras, Pandas, NumPy, Matplotlib

Built a time-series forecasting model using LSTM to predict stock closing prices from historical data. Integrated data fetching, preprocessing, and visualization pipeline to analyze trends and improve prediction performance.

Certifications

- Neural network with Python. - Vois
- Building neural network with Keras. - Vois
- Data Manipulation with Pandas - DataCamp
